Improves student results and behaviour

Reduces teacher voice strain

Connevans

Supplying to schools since 1961

Soundfield from Connevans

We are so confident that you will love using the IR Swift+ Classroom Soundfield system that we are offering UK schools a Free Trial!

Free Trial for UK schools!

The Free Trial will be very easy for you... at a convenient time, we will come to your school, set up the IR Swift+ and show a teacher how easy it is to use. Setting up will usually just take around 15 minutes, all we need is a mains socket at the back of the classroom to plug in to.

At the end of the 3 - 4 week trial period, assuming you like using the IR Swift+ and it has made a positive difference to the teaching and learning in your classroom, then you can keep the system and pay the invoice – alternatively, you can just send it back to us – it really is that simple!

To arrange a free trial for your school, please just email our director Phil Boswell phil@connevans.com and leave the rest to us!

Connevans Limited – established 1961

Connevans is an independent family-run company, established over 50 years ago. We are specialist manufacturers and suppliers of soundfield systems.

Connevans derives its name from its founders, Meurig & Connie Evans and is still very much a family firm. It is now run by their son David, daughter Mary and granddaughter Laura, alongside their co-directors.

Connevans is a regular supplier to schools and education authorities as well as private customers and, over the years, we are proud to have built up a reputation for manufacturing and supplying quality products, supported by fantastic customer service.

Our Soundfield Team are happy to offer help, advice and technical support on all the products we supply, just get in touch!

Our Soundfield Team

From initial enquiry through to after sales support our team will be here to help you.

Phil Boswell, Robert Manwaring, Richard Vaughan, Angie Martin and John Popplestone

How to contact us

Soundfield for teachers

Do you regularly have to raise your voice to be heard ???
Is your voice tired at the end of the day ???
Are the students at the back of the class inattentive ???
Would you like your students to get better results ???

A soundfield system from Connevans can help you resolve these questions, and more!

Soundfield systems enhance the sound of your voice throughout the classroom, so the students at the very back can hear clearly and concentrate fully, as well as the students at the front.

Natural voice
Soundfield systems are specifically designed to provide a nice natural sounding voice tone – they are not PA systems!

Reduce classroom noise
Many classrooms are noisy and have poor acoustics, making it difficult for students to hear your voice. If they do not hear clearly, they will find it hard to concentrate.

Reduced voice strain
Continually raising your voice in class can be stressful and can lead to vocal health issues.

Soundfield systems help you through the sound barrier

Relaxed learning
Student understanding and learning improves and classroom control is easier, creating a relaxed learning environment.

Less supply teaching
With reduced voice strain, teacher sickness time is reduced.

League tables
Improved learning will lead to improved results for both students and school.

It's easy
We come to you to show you how a soundfield system can make a big difference for you.

Soundfield is spreading

It's no surprise that more and more of the UK's educational professionals are singing the praises of soundfield. Once you use one, we know you'll see what we mean!

Your teaching is important, you need to be heard ...clearly!

For more information **call Connevans on 01737 247571** and our friendly and experienced staff will be delighted to help you.

Connevans IR Swift+

Swift to install ... simple to set up ... easy to use

The Connevans IR Swift+ soundfield system is a groundbreaking use of technology to bring superb quality sound within financial reach of every classroom.

Free Trial for UK schools, contact us today!

Flat panel speaker unit

The IR Swift+ has a single hyper-wide dispersion flat panel speaker unit with nxt* technology* which produces an effective soundfield from a single speaker.

Using high quality infra red wireless technology, you can have up to two microphone transmitters with each system – a main one for the teacher and a second one for student participation or a teaching assistant.

Swift TX transmitter for tutor

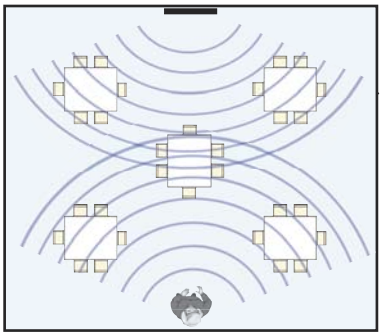
System Features:

Handmic for guests and passing round

- **Excellent speech clarity**
- **Remote Volume Control** from a Swift TX transmitter
- **Virtually no installation** – can be hung on the wall in just 5 mins; as easy as hanging a picture
- **Stylish design** – fits easily into your classroom
- **Simple to use** – only 6 controls which rarely need adjusting
- **Easy to use with your existing equipment** – includes a lead for connecting iPod etc.
- **Manufactured and designed in the UK** optimised for European language sounds

It really is this easy!

Connect to any standard headphone socket



When in use the system actually has two 'speakers' – one is the IR Swift+ and the other is yourself – providing a sound source at both ends of the room.

Phil says: The IR Swift is our **most popular choice**. This single wall-mounted unit gives **excellent sound quality** suitable for most classrooms; it is **easy to install** and also has the **lowest price tag** when the cost of installation is considered

All IR Swift+ systems come with 3 years warranty as standard

Price guide: from **£724** +VAT with Swift TX transmitter

**Trademark of New Transducers Limited Manufactured under NXT Licence*

Connevans Swift TX microphone

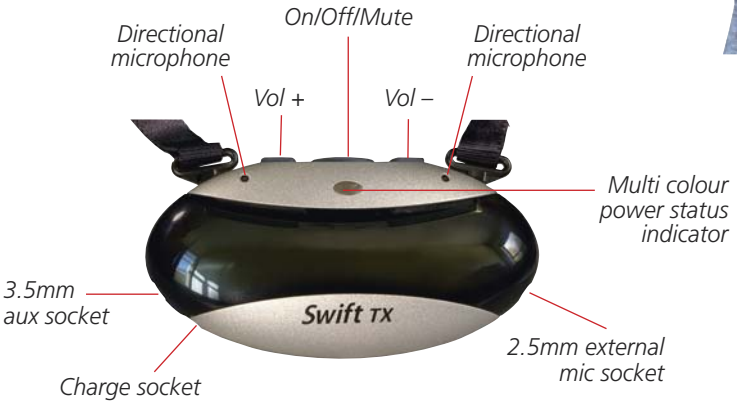
Designed by Connevans with teachers in mind, the Swift TX has been developed to have outstanding technical performance and also to be the smallest and lightest transmitter of its kind!

Our recommended choice

Natural high quality sound is vital in a classroom to ensure the best listening and learning environment for students. The Connevans Swift TX has the widest frequency response of any IR soundfield microphone transmitter available in the UK, meaning it gives the most natural sound.

Microphone Features:

- **Attractive design: light, comfortable and easy to wear** – just 79g including battery
- **Digital audio transmission**
- **Very wide audio frequency response** for full vocal range
- **Superb natural sound quality** – with vocal clarity enhancer and dual directional microphones



Free Trial for UK schools, contact us today!

The Swift TX transmitter looks appealing and is as light and comfortable to wear as a necklace.

Stylish looks with technical excellence!

Unrivalled technical quality

We've packed the Swift TX with innovative technology to ensure that it is 'top of the class' for quality & performance.

The Swift TX uses two separated microphones to provide a constant level of sound as the user's head is turned from side to side. These specially optimised dual directional microphones give optimum voice pickup and reduce unwanted background noise.

The audio frequency bandwidth of 120Hz to 13kHz ensures the very best sound quality and we have specially designed feedback reduction built into the microphones.

Remote Volume Control

IR+RVC

Using a Swift TX transmitter with an IR Swift + you can adjust your Soundfield volume from anywhere in the classroom.

Once the volume is set on your IR Swift + you should rarely need to adjust it but if the class is more boisterous than usual, you can change your microphone volume with the easy press of a button – without having to go to the Soundfield unit.

Azden IRR-30P

A straightforward and affordable fixed classroom soundfield system. Great for those who are looking for an excellent value multi-speaker system.

The most economical multi-speaker soundfield solution!

WARRANTY 3 YEARS

The Azden IRR-30P combines the flexibility of an Infra Red system with practical features such as a twin-channel receiver and two auxiliary audio inputs for connection to interactive whiteboards, computers, CD or MP3 players etc.

The IRR-30P is the ideal choice where security is not an issue.

The Azden IRR-30P is compatible with all Connevans classroom soundfield microphone transmitters and you can have up to two with each system – a main one for the teacher and a second one for student participation or a teaching assistant.

Price guide: from **£872**+VAT for an installed system with Swift TX transmitter & 4 wall speakers

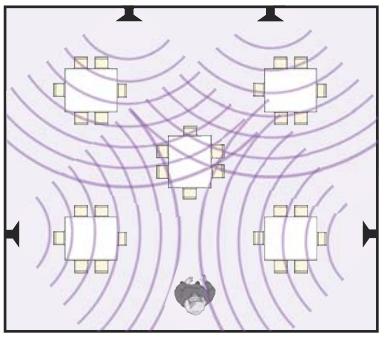
Connevans IR Classmate

Developed by Connevans, the IR Classmate is our deluxe classroom soundfield system. This multi-speaker solution with a secure lockable wall unit gives fantastic sound coverage and quality.

The whole system provides a clear and natural listening experience with a quality of sound that is the best in the market.

Key Features:

- **Superior sound quality and classroom coverage** with built-in feedback reduction
- **Secure wall mounted box** the most sensible choice for classrooms with unsupervised access
- **Speaker options for all classrooms** with either 4 or 6 wall speakers or up to 4 ceiling tile speakers, the IR Classmate can be installed in unusually shaped rooms
- **Designed with Connevans care and attention to detail** e.g. the system is automatically turned on when the cupboard is unlocked
- **Charging made easy** – transmitters can be charged inside the locked cupboard at night, stopping automatically when the batteries are full
- **Easy to use with your existing equipment** – ideal for connecting to a computer or interactive whiteboard
- **Manufactured and designed in the UK** optimised for European language sounds



IR Classmate – 4 wall speakers

Price guide: from **£1276**+VAT for an installed system with Swift TX transmitter & 4 wall speakers

All IR Classmate systems come with 3 years warranty as standard!

Wall mounted speakers installed around the classroom
IR Classmate unit
Optional handheld second microphone
Teacher wears main microphone transmitter

Meryl Hunt and students at Auriol Junior School, Epsom, Surrey

Phil says: The IR Classmate is our **top of the range** system. Ideal for all classrooms and particularly good for classrooms that are more acoustically challenging.

Phonak Roger Dynamic SoundField

The Phonak system uses unique digital Roger technology, automatically adjusting to enhance comprehension, even in noisy situations.

A particular strength of this system is the easy integration with Radio Aid systems, especially the Phonak Dynamic FM and Roger Ear Level Receivers, which helps hearing impaired students integrate into the mainstream classroom environment.

At its core, the Roger SoundField system comprises the DigiMaster 5000 loudspeaker unit and Phonak's inspiro teacher transmitter.

Up to 34 additional transmitters (either Roger inspiro or Roger DynaMic passaround mics) can be used alongside the first Roger inspiro to widen the discussion. The DigiMaster loudspeaker can be wall-mounted or positioned on a sturdy floor stand.

Key Features:

- **Fully automated settings** – the system measures the room's actual noise levels and adjusts the frequency and volume levels accordingly
- **Exclusive built-in FM and Roger compatibility** no re-broadcasting necessary for deaf students with Radio Aids
- **Intelligent frequency hopping** preventing interference between systems on the same site
- **Software updates available** as new features are released
- **Roger inspiro AudioHub** can be added to play one or two audio sources
- **Unique speaker design – 12 speakers in one!** Emits cylindrical sound waves giving good room coverage and directionality

John says:
The Phonak Roger system is great for schools already using Phonak Radio Aid systems for their deaf students.

Larger Phonak Roger SoundField systems for use in school halls are also available – please contact us to discuss your requirements

Connevans SoundRanger portable PA systems

Portable wireless amplifiers with built-in radio microphone receivers. Ideal outdoor sound reinforcement solution and great indoors where a fixed installation is not appropriate.

Fully portable

In School these units can be moved from class to class for the benefit of both teachers and pupils; larger models are suitable for the Hall or outdoors for Sports Day!

All-in-one solution

These portable products offer an excellent quality, cost effective and flexible sound reinforcement solution. They include built-in radio microphone systems, with the receiver, pre-amplifier, power amplifier and speakers all in one unit – which means no connecting cables.

Although they are sophisticated internally, SoundRanger systems require no user experience to operate.

There are 2 sizes of battery powered system: the **SoundRanger Micro** for classrooms and the larger **Compact4** range for school halls or outdoor use – great for sports day!

SoundRanger Micro – suitable for a classroom or audiences of up to 50 people

The Micro can be used on a speaker stand or just placed on a handy shelf. They are small and light with a built-in battery making them fully portable.

SoundRanger Compact4 – suitable for a school hall or audiences of up to 500 people

The Compact4 has the same excellent sound quality of the Micro... but with more power and more facilities.

The Compact4 includes a range of different models, giving you the option to expand the system by adding a second unit or a second microphone.

Price guide: from **£169**+VAT for a SoundRanger Micro and handheld transmitter

Also available, the more powerful mains only Compact2M, see www.SchoolSoundfield.co.uk

Microphone options include handheld, headworn and collarworn

soundranger

Excellent sound quality for a fantastic price!

Robert says: SoundRanger portable PA systems are **simplicity itself** – just switch on, set the volume and talk!

School Hall Soundfield Systems

The school hall is usually a focal point in the life of a school. It is used daily for lessons and assemblies and throughout the year for important events such as plays, concerts and open days.

With a Connevans Hall Sound system, everyone in the hall (teachers, students, parents and guests) will hear clearly – giving you a clear advantage!

Why choose a hall soundfield system?

- **Everyone in the hall will be able to hear the person presenting ... all of the time**
- **Great sound will impress parents, prospective parents and visitors at school events**
- **To make the most of the hours of preparation for assemblies put in by staff and children**
- **To encourage participation from even the shyest children in performances**

Who do soundfield systems help?
Everybody!

It is important to get the correct system for your school so we'll come to you to discuss your requirements and give advice – free of charge!

Completely flexible systems

– we offer a range of speakers and a choice of microphones

Speakers: 4, 6 or 8 professional JBL speakers, large or small, black or white

Number of microphones: 2, 4, 6 or 8 Trantec wireless radio microphones

Type of microphones: Head worn, collar worn or handheld radio microphones

Customise with add-on features

– connect to your existing equipment

Add in: single or twin CD player iPod dock, MP3 player or induction loop amplifier

Connections to: plug in your iPad, laptop or projector

Re-broadcast: use with all types of Radio Aids for children with a hearing loss

It's easy! Connevans have years of experience – we are the experts!

On the day, our highly trained and experienced staff install everything for you. We will show you how to use the system and you have our promise, it's all very easy.

After installation, if you have any questions or queries at all, just contact our Soundfield Team who will be able to help you.

Our low prices & great value for money will amaze you

Prices from **£2255**+VAT for an installed system with 6 speakers and 2 radio microphones.

Free site survey visit

Just call or email us and we will arrange a convenient time to visit you

© Connevans Limited

Our most popular system

The SYS26 is supplied in a sturdy wall-mounted cabinet with 6 white speakers. Inside the cabinet is a CD/USB player and 4 radio microphones.

This system is ideal for assemblies, presentations and school productions.

What's included in a Connevans SYS26 system...

Lockable cabinet mounted on the wall with built in connection panel, storage drawer and audio mixer

2 x radio microphones with belt pack and collarworn microphone

6 x white speakers mounted high on the wall around the hall

2 x handheld radio microphones with floor stands

Delivery and Installation in your hall

CD/USB player installed in the cabinet

plus all the connecting leads, batteries, & chargers you'll need to use the system

...all for a fantastic £3960! (+ VAT)

Suitable for...

Assemblies

School productions

Prizegiving

Parents Evening

We have standard packages which will suit many situations – we are also able to apply our expertise to create a bespoke package to suit your school's requirements.

Do you use your hall in different configurations?

For complete flexibility, we can supply your hall soundfield system in a wheeled cabinet.

We install two connection points in your School Hall (usually one at each end!) so the system can be operated from different places, depending on how your assembly is planned.

Then when the event is over it can be easily disconnected and kept safely in a storeroom.

Don't just take our word for it...

This is what some of our customers have said about their new equipment and the difference it has made!

Best investment
The soundfields continue to be one of our best investments with staff now fully on board with using the systems. I know that if I said we were taking them out there would be riots!!
Fiona, Bedfordshire Senior School

Thanks
I would like to say a BIG thank you for bringing all the equipment and showing me how to set it all up. Thank you. I took one of the Soundfields in to a school and set it up in the classrooms and the teacher was amazed!! All the staff were popping in and they all wanted one.
Hayley – Teacher of the Deaf

We want more
All our Soundfield are up and running and really helping the whole of the class which is great. I am hoping that we will be able to purchase more towards the end of this academic year.
Sarah, SENCO ST Andrews Primary

More, please!
We are getting on really well with the Soundfield system, we would like to purchase an additional one!
Kate, Herefordshire Primary School

Training
Many thanks for the training, you do a good job: informative, clear and to-the-point. If only all training were so!
Stephen, ICT Technician, Stephen Hawking School

Support
I just wanted to say a very BIG thank you for all your help. You have been incredibly patient and clear and the whole process has been stress free thanks to your support.
Kath, Specialist Advisory Teacher of the Deaf
